

CURRICULUM VITA

PERSONAL INFORMATION

Ping Lu
 Professor and Chair
 Department of Aerospace Engineering
 San Diego State University
 San Diego, CA 92182

Email: plu@sdsu.edu
 Cell phone: (515) 451-3511

Education

Ph.D.	Aerospace Engineering, the University of Michigan	1988
M.S.E.	Aerospace Engineering, the University of Michigan	1984
B. S.	Beijing Institute of Aeronautics (now Beihang University)	1982

Academic Experience

Professor and Chair, Aerospace Engineering, San Diego State University	2016-present
Professor, Aerospace Engineering, Iowa State University	2003-2016
Associate Professor, Aero. Engr. & Engr. Mech., Iowa State University	1995-2003
Assistant Professor, Aero. Engr. & Engr. Mech., Iowa State University	1990-1995
Post-doctoral Associate, Aerospace Engineering, University of Michigan (Co-advisers: Elmer Gilbert and N. X. Vinh)	1988-1989

Editor-in-Chief Position

Editor-in-Chief, *Journal of Guidance, Control, and Dynamics* (JGCD) 2013-present
 The JGCD is the premier international journal in aerospace guidance, control, and flight dynamics, and one of the top ranked research journals in the category of Aerospace Engineering by all major citation indices. JGCD is the 2nd largest journal by AIAA in terms of paper submissions and circulation. As the EIC, Prof. Lu oversees 2 Deputy Editors and 33 Associate Editors, and is responsible for quality and operation of JGCD.

Honors and Awards

<p>Fellow, American Institute of Aeronautics and Astronautics (AIAA) <i>“For outstanding contributions in theory, methodology and algorithms for advanced guidance, particularly in entry and ascent flight of space transportation systems”</i>; Only about 30 AIAA Fellows worldwide are elected each year.</p>	2016
<p>NASA Johnson Space Center Director’s Innovation Group Achievement Award For <i>“exceptional work in pioneering the development of a fully-numeric predictor-corrector entry guidance algorithm for the atmospheric entry of space vehicles”</i>. The algorithm cited was developed by Prof. Lu</p>	2016
<p>Mechanics and Control of Flight (MCF) Award (AIAA) <i>“For contributions in advanced guidance algorithms for entry and ascent flight”</i> The AIAA MCF Award is a prestigious award in the aerospace guidance, control, and flight mechanics community, with a long and rich history since 1967. The MFC Award is presented for an outstanding recent technical or scientific contribution by an individual in the mechanics, guidance, or control of flight in space or the atmosphere.</p>	2008

AIAA Sustained Service Award	2006
<i>“For exceptional sustained service to the AIAA through contributions at the publication, sector and technical service levels”</i>	
Outstanding Contribution to AIAA at the National Level	2018
AIAA San Diego Section	
Young Engineering Faculty Research Award, Iowa State University	1997

RESEARCH ACTIVITIES

A hallmark of Prof. Lu’s research program has been addressing real-world challenges encountered in aerospace systems and engineering with academic rigor. In this pursuit Prof. Lu has worked extensively with NASA, DoD, and the Aerospace Industry. Prof. Lu is one of the very few university researchers who were fortunate to have involved in multiple major NASA programs in space transportation systems such as the X-33, Space Launch Initiative/Next Generation Launch Technology, Orion Crew Vehicle, and the Evolvable Mars Campaign for human Mars missions.

Current Research

- Advanced guidance of space transportation systems
Full-spectrum space system guidance covering launch ascent, on-orbit maneuvers, rendezvous and proximity operations, orbital transfers, aerocapture, planetary entry, powered descent, and landing; development of theory, methodology, algorithms, and software for real-time on-board applications
- Computational guidance and control for autonomous aerospace systems
Novel model-based computational methods for autonomous and fault-tolerant operations of aerospace systems; autonomous trajectory optimization and planning; theoretically and physically informed algorithmic designs for computational efficiency and assured convergence; applications in highly constrained missions and on-board environments
- Hypersonic guidance and flight mechanics
Guidance of hypersonic gliding flight; Optimal hypersonic powered (booster) flight; Hypersonic flight mechanics; integration of advanced guidance and control in multidisciplinary hypersonic systems

Research Impact

- In the 2022 update of a multi-year study of author impact in 176 scientific subfields by a team from the Stanford University (the study is now hosted by Elsevier at <https://elsevier.digitalcommonsdata.com/datasets/btchxktzyw/5>), Prof. Ping Lu was ranked the **No. 9** of the top 2% authors out of 49,631 authors worldwide in the subfield of *Aerospace & Aeronautics* based on single-year impact (2021), and **No. 23** based on career-long impact. The rankings are determined by a composite indicator (<https://journals.plos.org/plosbiology/article?id=10.1371/journal.pbio.3000384>) that measures multiple variables, accounting for the number of citations, authorships, the productivity and citation impact of a given publication, and more.
- The entry guidance algorithm FNPEG, developed by Prof. Lu, is regarded by NASA and industry as the state of the art of guidance algorithm for spacecraft planetary entry and hypersonic gliding flight; a commercial space company plans to use FNPEG for their spacecraft when returning from the International Space Station.
- The optimal aerocapture guidance algorithm FNPAG developed by Prof. Lu is the only theoretically rigorous *optimal* guidance algorithm for aerocapture, and considered the state-of-the-art guidance algorithm for aerocapture maneuvers. Aerocapture is an enabling technology for high-mass/human-scale Mars landing missions and missions to other destinations in the Solar System.

- Prof. Lu's pioneering work in algorithmic development and applications of convex optimization in non-convex aerospace guidance and trajectory planning problems has helped usher in the very area of active current research on the subject matter
- The propellant-optimal planetary powered descent guidance algorithm developed by Prof. Lu is the most influential among the powered descent guidance approaches based on the indirect method
- Prof. Lu is a member of the Technical Discipline Team (TDT) in Guidance, Navigation, and Control, NASA Engineering & Safety Center (NESC). The NESC is a NASA agency-wide organization, created after the Space Shuttle Challenger accident. It provides a forum for reporting technical issues and contributing alternative viewpoints to resolve NASA's highest-risk challenges. Only about 3% of the NESC members are from academia.

Selected Keynote and Invited Presentations in Last 5 Years

- "The Correct, Wrong, and Unethical Ways in Citing References in Technical Papers", Keynote Speech, International Conference on Aerospace System Science and Engineering (ICASSE) 2022, July 6, 2022
- "The Peril of Linearization", Keynote Speech, International Conference on Aerospace System Science and Engineering (ICASSE) 2021, July 15, 2021
- Aerospace Control and Guidance Systems Committee, Meeting 127, November 3, 2021
- "A Curiosity in Engineering Mathematics", Keynote Speech, 2020 International Conference on Aerospace Sciences and Technology, July 13, 2020
- NASA Marshall Space Flight Center, January 28, 2020
- "From Apollo to Artemis: Computation and Aerospace Guidance in 50 Years", GALCIT Colloquium, California Institute of Technology, November 1, 2019
- "Integrating Entry and Powered Descent Guidance", Jet Propulsion Laboratory, August 12, 2109
- "Aerospace Guidance in 50 Years", Institute of Aerospace Studies, University of Toronto, April 5, 2019
- "Reincarnation of Apollo Lunar Descent Guidance: Landing Humans on Mars and Beyond", School of Aeronautics and Astronautics, Purdue University, September 6, 2018
- "Powered Descent and Landing for Human Mars Missions", Keynote Speech, International Conference on Aerospace Sciences and Technology, Moscow, Russia, July 31, 2018
- "Computational Guidance and Control", School of Aerospace Engineering, Georgia Institute of Technology, October 27, 2017

TEACHING ACTIVITIES

Courses Taught

At San Diego State (Voluntarily teach 2 courses a year, as the Department Chair)

Aerospace Guidance and Navigation	(senior elective/graduate; course developer)
Optimal Control	(graduate; course developer)

At Iowa State (Nominally taught 4 courses a year, as a research-active faculty)

Flight Control Systems I	(undergraduate)
Astrodynamics I	(undergraduate)
Flight Dynamics and Stability	(undergraduate)
Flight Control Systems II	(undergraduate)
Automatic Control for Flight Vehicles	(graduate)
Space Flight Mechanics	(graduate)
Entry Dynamics	(graduate; course developer)
Guidance and Navigation of Aerospace Vehicles	(graduate; course developer)
Optimal Control	(graduate)
Special Topics in Optimization	(graduate)

PROFESSIONAL SERVICE

Editorial Positions

Editor-in-Chief, <i>AIAA Journal of Guidance, Control and Dynamics</i>	2013- present
Associate Editor, <i>AIAA Journal of Guidance, Control and Dynamics</i>	1996-2013
Member of Editorial Board <i>Optimal Control Applications and Methods</i>	2009-present
Subject Editor (Aerospace and Mechanical Systems), <i>Optimal Control Applications and Methods</i>	2004-2008

NASA Engineering & Safety Center (NESC)

Member of NESC Technical Discipline Team in Guidance, Navigation, and Control	2022-present
---	--------------

Professional Reviews

1. Reviewer for proposals submitted to NSF, AFOSR, NASA, Canadian Natural Sciences and Engineering Research Council, and CASIS (The Center for the Advancement of Science in Space, the organization that manages research activities at the International Space Station)
2. Reviewer for: *Journal of Guidance, Control and Dynamics*, *Journal of Spacecraft and Rockets*, *Acta Astronautica*, *Automatica*, *IEEE Transactions on Automatic Control*; *International Journal of Control*; *ASME Journal of Dynamic Systems, Measurement and Control*, *ASME Journal of Engineering for Industry*; *Optimal Control: Applications and Methods*; *Journal of Optimization Theory and Applications*, *Journal of Aerospace Engineering*; *Journal of Vibration and Control*, the *Journal of Astronautical Sciences*.
3. Reviewer for: American Control Conference, IEEE Conference on Decision and Control; IEEE Conference on Control Applications; AIAA Guidance, Navigation and Control Conference; AIAA Atmospheric Flight Mechanics Conference; World Congress of the International Federation of Automatic Control; ASME Design Automation Conference, European Control Conference

Professional Society Leadership Positions

- Organizer, Invited Sessions on GN&C for the Orion Crew Exploration Vehicle, AIAA Guidance, Navigation, and Control Conference, 2007
- Program Committee, 2002 American Control Conference
- Program Co-Chair, AIAA Guidance, Navigation, and Control Conference, August 14-17, 2000, Denver, CO
- AIAA Society Review Chair for American Control Conference (1997)
- AIAA Associate Director for American Automatic Control Council (1996-1998)

Evaluator for Promotion and Tenure Cases

Prof. Lu has served as an evaluator for Promotion and Tenure cases for candidates from leading research universities in the US and abroad (Caltech, Georgia Tech, Purdue, University of Colorado Boulder, Virginia Tech, University of Washington, University of Toronto, University of California, University of Texas, Iowa State, Naval Postgraduate School, University of Kansas, York University, University of Strathclyde, University of Missouri, Mississippi State, ...)

Institutional Service and Faculty Mentoring

Prof. Lu has served on numerous committees at the department, college, and university levels, as a member or the chair. He has been the mentor for 10 junior faculty members over the years.
